Annual Report

BioBuilder
Educational Foundation

Dear Friends

This year marks BioBuilder's 10th anniversary. It is a milestone for any non-profit organization and it is cause for celebration, reflection, and a focus on the future. This is especially true for BioBuilder. We not only celebrate the tremendous strides we have made over the past decade and in this year alone. We also look towards future horizons, where we will expand our unparalleled programming so a greater number of diverse students can use their acquired skills and training in the job market.

I am so deeply proud of BioBuilder and its community, and I am beyond grateful for all who have supported its important work. The success of our last decade, our last year, and indeed our future, would not be possible without gracious and generous partners. As you will see from this report, our funds are used with concerted care to positively impact our students. Our connections and collaborations work to strengthen our overall success. Together we are growing the future.

We now have a decade of success in identifying, training, and nurturing young innovators, helping the students of today become the bioengineering groundbreakers of tomorrow. Many horizons have been discovered, and I am excited for the horizons ahead. The need for BioBuilder is undeniable and growing. Please join us and help us thrive on our journey.

With gratitude,

Natalie Kuldell
President, The BioBuilder
Educational Foundation

BioBuilder by the Numbers

BioBuilders are teaching and learning in more locations than ever

47 States

54 Countries

Students and teachers in **5 states** and **3 countries** formed BioBuilderClubs
